Nuget packages: Shared library in NET9.0 SdkProject

A nuget project doesn't include a references shared library.

(opening the Your.Client.1.0.1.nupkg should have the library in the "lib" folder)

You can force it by modifying the cs.proj

```
<ItemGroup>
  <Reference Include="Your.Lib.Shared">
    <HintPath>..\SecurityHoney.Lib.Shared\bin\Release\net9.0\Your.Lib.Shared.dll</HintPath>
    <Private>true</Private>
  </Reference>
</ItemGroup>
<ItemGroup>
  <Content Include="..\Your.Lib.Shared\bin\Release\net9.0\Your.Lib.Shared.dll">
    <Pack>true</Pack>
    <PackagePath>lib/net9.0/</PackagePath>
  </Content>
  <Content Include="..\Your.Lib.Shared\bin\Release\net9.0\Your.Lib.Shared.pdb">
    <Pack>true</Pack>
    <PackagePath>lib/net9.0/</PackagePath>
  </Content>
</ItemGroup>
```
