

MAUI - physical iPhone deployment (without Mac)

In some cases the MacInCloud isn't sufficient: to test BLE devices you do need a physical device, for example.

In that case, you can get a cheap iPhone SE2020 or similar - unfortunately you cannot link that phone over RDP (your macincloud) to its USB to deploy via Visual Studio.

- 1) You'll have to install Itunes and get a developer account
- 2) You'll have to activate your developer account (which is 99€ annually)
